Welcome to C Programming

You have just started your internship at your dream company. Before the boss can give you any significant task, he wants to gauge your ability to use the C programming language. As a start, he wants to test your basic programming skills, such as handling user input and output. As the new intern of the company, your boss asked you, a programmer, to create a simple program that welcomes new team members. Your task is to create a program in C that generates a personalized welcoming message.

Format Input

The input consists of a single line, which is a string representing the name of the person to be welcomed.

Format Output

The output should be a welcoming message in the following format: "Hello [name]! Welcome to C Programming!"

Sample Input 1 (standard input)

```
Maxim Gunther
```

Sample Output 1 (standard output)

```
"Hello Maxim Gunther!  Welcome to C Programming!"
```

Note: Remember to always print a '\n' at the end of the output

Welcome to C Programming

Anda baru saja memulai magang di perusahaan impian Anda. Sebelum bos memberi tugas penting kepada Anda, dia ingin mengukur kemampuan Anda dalam menggunakan bahasa pemrograman C. Sebagai permulaan, dia ingin menguji keterampilan pemrograman dasar Anda, seperti menangani input dan output pengguna. Sebagai karyawan magang baru di perusahaan, bos Anda meminta Anda, seorang programmer, untuk membuat program sederhana yang menyambut anggota tim baru. Tugas Anda adalah membuat program di C yang menghasilkan pesan sambutan yang dipersonalisasi.

Format Input

Inputnya terdiri dari satu baris, yaitu string yang mewakili nama orang yang akan disambut.

Format Output

Outputnya harus berupa pesan sambutan dalam format berikut: "Halo [nama]! Selamat datang di Pemrograman C!"

Sample Input 1 (standard input)

```
Maxim Gunther
```

Sample Output 1 (standard output)

```
"Hello Maxim Gunther!  Welcome to C Programming!"
```

Note: Remember to always print a '\n' at the end of the output
